RRP: \$39.95
Format/Page No.: A4, 114 pages
Age Group: P-12
Topic: Activities & exercises,
Critical & creative
thinking
Learning Area: Cross-curricular

Summary:

Thinking tools are the strategies or scaffolding through which students can access the curriculum. They can be defined as artificial devices that have been developed specifically to improve children's thinking by:

- Focusing their attention visually on an issue that needs to be resolved
- Offering immediate feedback through seeing their ideas on paper
- Seeing the big picture
- Making new connections
- Analysing complex situations
- Developing new thinking skills
- Creating new ideas and products

In this exciting new resource, author Ralph Pirozzo offers an introduction to teachers to the world of thinking tools, covering a range of different tools for different tasks, and directing teachers as how to choose the most appropriate tool for each. Transform your school into a thinking school with this helpful guide.
